

## **Premier Directional Drilling to Demonstrate Exclusive Drilling Technology During the 2018 DUG East Conference**

**Houston, TX (June 19, 2018)** – Premier Directional Drilling, a Tally Energy Services company, today announced its participation at the 2018 DUG East Conference. As one of the most innovative drilling service companies, Premier Directional Drilling owns and operates three different technology platforms and will exhibit these technologies at booth #420.

With bigger wells and more pipeline capacity, activity is picking up in the Marcellus and Utica shale plays, DUG East shines a light on the regions' exceptionalism and prospects for serious growth. Speakers will discuss trends in North America's top natural gas-producing stars June 19 - 21 in Pittsburgh, PA.

Providing services on rigs in each of the major North American shale plays and drilling over 21 million feet, Premier Directional Drilling provides expertise in directional planning, directional drilling, downhole performance motors, rotary steerable services, directional surveying, and is anchored by next generation downhole measurement-while-drilling services (MWD).

Premier has adopted a strategy of owning its technology and will incorporate technology from Tally's latest acquisition, Gearcon Drilling Tools, Inc., to own rugged mud motor designs. As producers continue to evolve their approach, Premier has taken sizeable efforts to partner with, assist with launch, and deploy capital early to those in the innovation space.

Premier Directional Drilling President and Founder, Michael Kennedy, is available to speak with the media about its offerings for the oil and gas industry.

"DUG East is an excellent forum for deepening our business partner relationships and resources and helping industry professionals prepare for growth by providing access to our representatives and innovative solutions," said Kennedy.
